

Guidelines for Eligibility For Delaware's Screening for Life Program

Screening for Life offers free screening tests for breast, cervical, colon, lung, and prostate cancer. You may be eligible if you:

- Are a Delaware resident
- Have health insurance that doesn't cover screenings
- Are age 18-64 and not eligible for Medicaid
- Are age 65 or older and do not qualify for Medicare
- Meet income guidelines
- Are not eligible for health insurance from the Health Insurance Marketplace

Get Screened for Cancer

Three of the most commonly diagnosed cancers -- breast, colorectal, and prostate -- can be detected and treated in their earliest stages.

The chart below indicates the age at which you should be screened and how often.

RECOMMENDED CANCER SCREENINGS

Cancer Type	Recommended Age	Screening
Prostate	Average Risk: Men 50 & Older High Risk: Men 45 or older, including African Americans and men with a <u>first-degree relative</u> diagnosed with prostate cancer at an early age (defined as younger than 65 years). Higher Risk: Men 40 and older - men with more than one first-degree relative who had prostate cancer at an early age (less than 65 years old).	Prostate-Specific Antigen (PSA) Test with or without a Digital Rectal Exam (DRE)
